

UVPhotoMAX™ UVP-3000

Ultravation® Portable UVPhotoMAX air treatment system kills airborne mold spores, bacteria and viruses

The UVPhotoMAX™ air purifier uses UV light to kill millions of airborne bacteria and viruses (including the flu). UV is a well-known disinfectant, used since the 1930s in hospitals, doctors offices, pharmacy and food industries as well as water treatment. It simply inactivates microscopic organisms, rendering them harmless. It leaves no by-products and uses no chemicals. UV is a component of sunlight—nature's way of controlling airborne microorganisms.

UVPhotoMAX reduces or eliminates hundreds of odors

At the heart of each UVPhotoMAX is the Ultravation® ReFresh™ advanced oxidation photocatalytic reactor. Hundreds of organic odors—from pets, foods, cooking, trash and garbage, paint, carpet, cleaning agents, plus musty damp smells from mold and mildew are broken down into harmless components.

Advanced oxidation reactor breaks down odors and disinfects the air

The two-band UV lamp is the key to high performance air purification

The ReFresh™ advanced oxidation process is powered by our specially designed **two-band UV lamp** and controlled by our patented*** **Photon Clarifier™** — an Ultravation exclusive! The exact amount of treatment is adjustable based on living space, temperature, humidity, and other factors. The Photon Clarifier™ slider control is located on the underside of the cabinet.

UVPhotoMAX™ uniquely uses two wavelengths of UV-C light to kill germs and break down odors.

Measuring just 12" x 9" x 3" — the UVP-3000 mounts on a wall or any flat surface

- Use in homes, offices, rest rooms, basements, kitchens
- Commercial grade stainless steel construction
- Very low power consumption—about the same as a small fluorescent light
- Twin air filters remove dust, hair and other airborne debris
- 110VAC operation
- UV lamp lasts one full year
- Adjustable two-band UV lamp optimizes effectiveness
- Wall mounting brackets included

Made in USA
All Ultravation air purification products are manufactured in our Vermont facilities. See our manufacturing video and learn more about our products at Ultravation.com
